Cantor Set Pendiente

Koch curve

We name entity to:

naming

We denote:

· property : notation

Koch snowflake

Let:

· statements

Then, *item* is a/an entity if:

· conditions

We denote:

· property : notation

Homotheocy

Let:

· $f : \mathbb{R}^n \rightarrow \mathbb{R}^n$

Then, f is a homothecy if:

- $\exists A \in \mathcal{M}_{n \times n}(\mathbb{R}), p \in \mathbb{R}^n$:
- $\forall x \in \mathbb{R}^n$:
- $f(x) = Ax + p$

We denote:

- *property : notation*
